

10-Day Action Plan: Mint-to Logic™ Command Schedule

Day 1: Masterproof Assembly

Goal: Establish irrefutable proof of first development

Tasks:

-  Gather screenshots from:
[make.com](#), [tally.so](#), GPT Assistant builds, Twitter/X, LinkedIn, website, Wix editor, timestamped email drafts
-  Sort by date & label each folder clearly
-  Record screenwalks of GPT use, prototype actions, post history
-  Draft “Proof of Invention and Date” doc (I can help write this)

 **Target Time:** 9 hours

 **GPT Use:** Timeline layout, claim doc drafting

Day 2: Protocol Deck Finalization

Goal: Capture the core protocol and its modular logic

Tasks:

-  Finalize definitions for:
Mint, Burn, Reflex Logic, Mirror Logic, Shadow Logic, Behavioral Pulse, Chrono-Synaptic Ledger
-  Write short explainer blurbs and one-pager
-  Design visual map of protocol relationships
-  Record voiceover or captioned diagram walkthrough

 **Target Time:** 10 hours

 **GPT Use:** Definitions, flowchart text, explainer content

Day 3: Governance Layer Blueprint

Goal: Position Southern Star Pro. as infrastructure governance

Tasks:

-  Define governance chair roles & voting weights
-  Create “Behavioral Logic Governance Charter” doc
-  Establish structure for strategic alliances (who gets what, how)
-  Begin public-facing doc explaining governance intentions

 *Target Time:* 8–9 hours

 *GPT Use:* Charter drafting, role definitions, alliance templates

Day 4: Licensing System Architecture

Goal: Formalize how others will legally access the tech

Tasks:

-  Build Mint-to Logic™ licensing tiers
-  Draft sample licensing contract (GPT helps draft legal-safe version)
-  Create a licensing calculator (flat rate + royalty or per-user seat)
-  Write partner FAQ and 1-page public license terms

 *Target Time:* 9–10 hours

 *GPT Use:* Draft templates, pricing model logic

Day 5: Strategic Outreach Kit

Goal: Prepare press + partner launch deck

Tasks:

- ☒ Build “Claim of Origin” PDF for investor/legal use
- ☒ Write email template to licensees
- ☒ Draft press release for industry media
- ☒ Draft tweet + LinkedIn + email thread templates

 *Target Time:* 8 hours

 *GPT Use:* Email drafting, press template, copywriting

Day 6: Prototype Wrap-Up & Video Proof

Goal: Demonstrate functioning logic prototype

Tasks:

- ☒ Record full walk-through of Validate → Mint → Burn
- ☒ Film commentary about its modularity and impact
- ☒ Draft a doc summarizing: system features, actual runs, logic result
- ☒ Upload proof to unlisted YouTube / embed in pitch doc

 *Target Time:* 8–10 hours

 *GPT Use:* Video script, summary doc

Day 7: Real-World Overlap Report

Goal: Document tech overlaps since March 15, 2025

Tasks:

- ☒ Use GPT to scan and compile news on NICET, Quranium, Accredible, FireflyAI, Estonia
- ☒ Build comparison grid (what overlaps, what doesn't)
- ☒ Create headline slide: “Industry Just Proved My Logic”

-  Add annotated proof screenshots to doc archive

 *Target Time:* 9 hours

 *GPT Use:* Comparison doc, quote analysis, chart formatting

Day 8: Final Packaging

Goal: Assemble all pitch-ready docs and tools

Tasks:

-  Combine all PDFs into one zipped investor/legal archive
-  Double-check timestamps and IP language
-  Create landing page or Notion board with links to all files
-  Finalize logo, brand statement, and file names for credibility

 *Target Time:* 8 hours

 *GPT Use:* Formatting, QA, brand language

Day 9: Soft Launch and Contact Phase

Goal: Make your public claim and begin outreach

Tasks:

-  Publish claim post on X and LinkedIn
-  Email press/media/investors
-  Message select insiders about licenses
-  Set up tracker to log replies, interest, and media hits

 *Target Time:* 9 hours

 *GPT Use:* Content drafts, pitch responses, CRM tracking template

Day 10: Strategic Lock-In & Next Phase Plan

Goal: Pick who gets a seat at the table

Tasks:

-  Choose 3–5 strategic firms to offer royalty/influence seats
-  Create presentation for exclusive governance seat invite
-  Draft follow-up for licensing enforcement + post-license audit phase
-  Start prepping for grant/investment application round (MIT, etc.)

 *Target Time:* 8–10 hours

 *GPT Use:* Invite letters, seat offer decks, grant templates

OUTPUT BY END OF 10 DAYS:

-  Time-stamped invention proof archive
 -  Protocol + Governance Documentation
 -  Licensing system with legal cover
 -  Pitch deck and outreach tools
 -  Website + GPT Assistant embedded in brand
 -  Readiness for funding, audits, licensing claims
-

Let me know if you want this in printable PDF form or broken into daily task lists. Would you like to begin **Day 1 now** with your first checklist and GPT workflow?
